# BEETLE

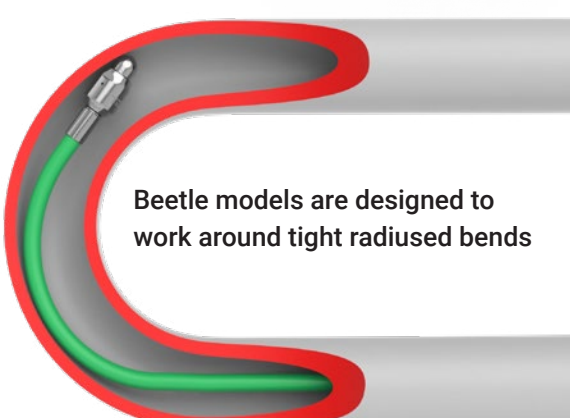
FOR USE IN SMALL ID TUBES WITH
***BENDS & ELBOWS***

**BT25** **BT18**

The small diameter and short length of the Beetle models make them ideal for cleaning process piping, drain lines, u-tube bundles and other small ID tubes with bends and elbows.

- Navigates tight curves in small diameter pipes
- Low cost, low maintenance design
- Easy to pair with automated flex lance machines

**BT12** **BT9.5**



**Beetle models are designed to work around tight radiused bends**
