Eagle Power Manual Sweepers

The **Eagle Power Products TK500M** and **Speedy** are the perfect all-purpose, manual walk-behind sweepers for large area applications.

The durable **TK500M** cuts a 26.4 inch cleaning swath, cleaning up to 26,900 ft²/hr. With its standard 10 inch (25 cm) side broom, the TK500M sweeps completely along edges. The unit also features height adjustment for the main and side broom with the steering casters up front, designed for maximum maneuverability.

The tough polyethylene front hopper will not dent or rust and is light in weight. The TK500M also features a rear hopper to capture light debris and further control dust.

The **Speedy** offers many of the same features and has a 20 inch sweeping path. The compact Speedy weighs only 17 pounds, and the handle folds for easy storage. The Speedy offers an inexpensive alternative to the TK500M at one-third the price.

Eagle Power Products' TK500M or Speedy walk-behind sweeper is the right tool for quick clean-up around work stations, confined areas and hard-to-reach places.
